About The Program

Our Mobile App Development program equips students and professionals with the practical skills and technical expertise needed to succeed in the rapidly evolving mobile economy. Learners master UI/UX design, state management, database integration, and programming languages like Swift, Kotlin, and Dart. The curriculum covers both native and cross-platform frameworks including React Native and Flutter, alongside App Store Optimization (ASO). Graduates are in high demand for roles in Mobile Engineering and Full-Stack App Development across tech-driven industries. We provide affordable, industry-relevant education powered by Soft code to empower India's workforce to lead and innovate.

"We exist to provide accessible, reasonable, and industry-relevant education that empowers India's workforce to grow and develop."

Program Highlights

ITop-Notch Faculty

Learn from industry experts with 12+ years of experience in Data Analytics and Business Intelligence

Guaranteed Job Interviews

Receive placement preparation and guaranteed interviews across a network of 2000+ hiring partners until you secure your first offer.

1:1 Dedicated Mentorship

Personalized learning experience from experienced industry professionals.

2-in-1 Certification

Earn both a Course Completion Diploma and an Internship Certificate to validate your hands-on expertise.

Program Details

COURSE PREREQUISITE

Prior knowledge of **programming/coding** is not mandatory. Just the urge to learn programming and basic ideas about advanced math is enough.

PROGRAM ELIGIBILITY

- ✔ **Working professionals** having more than 6 months of experience in any domain (Technical/Non-Technical)
-

KEY FEATURES

- ✔ Dedicated Placement Cell | 100% Guaranteed Interview calls
 - ✔ Globally Recognised **Certification from IBM & Microsoft**
-

JOB ROLES TO TARGET

Get equipped with the industry relevant skills and aim for job roles like Sr. Data Analyst, Data Engineer, BI Analyst, BI Developer, Database Admin etc.

Eduglar's ProjectLab

Choose Eduglar for your career journey because we're more than just a training provider. Our Project Innovation Lab lets you apply your skills in real-world scenarios. Get [dual certifications](#) for a competitive edge. Specialize in your desired domain. Discover how Learnbay can boost your career growth. Don't settle for less – choose Learnbay, your path to success!

1 Project Innovation Lab

Replicate a real-world industry environment for hands-on project experience.

2 Domain Electives

Enhance career prospects and excellence in your chosen field with our domain electives.

3 Dedicated Placement Cell

Experience 100% job assistance with guaranteed interview call from leading MNCs and startups globally.

4 Certification

Gain top-notch skills for a successful career through our degree and certification program

1 Project Innovation Lab

Edulgar's Project Innovation Lab replicates industry like environment for real time projects. With our **ProjectLab**, you gain real proof of hands-on experience by having your project certified by the industry.

In our ProjectLab, you work like a data scientist with dedicated project mentors from industry and get certified on capstone project.

2 Career Service

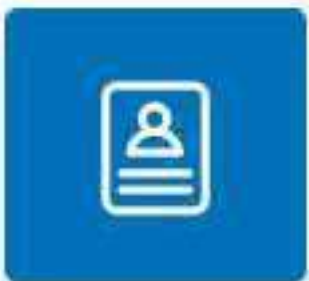

Get 1 Year of Job and Placement support

Unleash your career potential with 1 year of unlimited job access, interview support, and profile review.

1 Mock Interviews with Industry Experts

Master the art of data science & AI and stay ahead of the curve with mockups and industry insights

Resume Building Session

Craft a powerful resume showcasing your expertise in software development to stand out from the competition

4 Interview Calls

Receive 4 interview calls from a diverse pool of interested employers/recruiters.

Worlds leading certification

- Obtain an internationally recognized certificate through training
- Enhance your IT profile with internship certificate.
- Boost job opportunities and earnings with Eduglar's Certificate.

Learning Path

L1

Platform Fundamentals & Programming: Master core logic and syntax using languages like Swift, Kotlin, and Dart.

L2

Core UI/UX Design & Navigation: learn to create intuitive user interfaces and platform-specific navigation patterns.

L3

State Management & Data Persistence: Master handling user data and keeping app information consistent across sessions.

L4

Backend Services & API Integration: Connect your mobile applications to live databases and external services via REST and GraphQL.

L5

Testing, Performance & Optimization: Ensure high-performance applications through rigorous debugging and technical optimization.

L6

ASO, Deployment & Maintenance: Master App Store Optimization and the complete process of launching apps to global stores.

Program Syllabus

Module	Core Focus Area & Live Case Studies	Project/Deliverable
M1	Programming Foundations: Python basics and logic building for mobile environments.	Unit/Currency Converter App
M2	UI/UX Design: Mastering platform-specific navigation patterns and clean interface logic.	Digital Tip Calculator
M3	Native Development: Deep dive into Swift (iOS) or Kotlin (Android) essentials.	Basic To-Do/Notes App
M4	Cross-Platform Frameworks: Building high-performance apps using Flutter or React Native.	Real-Time Weather App
M5	State Management & Persistence: Handling local storage and complex data flow.	Local Data Storage Project
M6	Backend & API Integration: Connecting apps to REST/GraphQL services for dynamic content.	Social Media Clone Feed
M7	Advanced Cloud Services: Integrating Firebase, AWS Amplify, and push notifications.	Geolocation Event Planner
M8	AI-Driven Mobile Features: Implementing Generative AI for code optimization and app features.	AI-Enhanced Code Assistant

CASE STUDY

E-Commerce Mobile Transformation

Candidates are tasked with optimizing the checkout flow and integrating secure mobile payment gateways to reduce cart abandonment rates..

Real-Time Fleet Management

This study focuses on implementing advanced geolocation and live tracking features for a logistics application using Google Maps API.

EdTech Virtual Classroom

Applicants must design a high-performance interface for live video streaming and real-time student-teacher interaction.

Healthcare Patient Portal

This case involves architecting a secure system for sensitive medical data persistence and automated push notifications for appointment reminders.

Social Networking Feed Optimization

Candidates must refactor a complex data model to handle dynamic content feeds and image caching for a seamless user experience.

AI Generative Tools and Future Trends

Emerging Trends in AI and Generative Modeling

- ◆ Exploring other AI generative tools beyond [ChatGPT](#) and [DALL·E](#)
- ◆ Overview of Midjourney
- ◆ Discussion on future trends and advancements in AI generative tools
- ◆ Open-ended project and/or presentation on a selected topic, incorporating learned concepts

Natural Language Processing and ChatGPT

- ◆ Introduction to natural language processing techniques
- ◆ Understanding ChatGPT and its architecture
Hands-on exercises using ChatGPT for text generation
- ◆ [Fine-tuning ChatGPT for specific applications](#)

Midjourney

Bing

ChatGPT

DALL·E

Bard

DALL·E: Image Generation with AI

- ◆ Exploring image generation using DALL·E
- ◆ [Hands-on exercises for creating unique images with DALL·E](#)
- ◆ Ethical considerations and limitations of AI-generated images

Graph Neural Networks (GNN) for Data Analysis

- ◆ Overview of [Graph Neural Networks \(GNN\)](#) and their applications
- ◆ Hands-on exercises using GNN for tasks such as node classification and link prediction
- ◆ Case studies on real-world applications of GNN in data science

Real-time Projects

J.P.Morgan

Learn and develop high-performance applications for the digital transformation of retail

Build a **Tech Marketplace Platform** that utilizes a React Native front-end and a robust backend. Your task is to implement an advanced search and filtering system, allowing users to discover educational resources and courses with zero latency..

NETFLIX

Architect scalable data solutions for e-learning analytics and engagement

Develop an **E-Learning Analytics Dashboard** integrated into a mobile environment. You will design interactive visualizations to track course completion rates and user demographics, fetching real-time data from cloud databases like Firebase or AWS..

Master real-time collaborative features for the future of virtual classrooms

Create a **Virtual Classroom Application** that supports real-time document editing and live interaction. Use your expertise in WebSockets and cross-platform frameworks to synchronize data across multiple clients while ensuring top-tier security and consistency.

Implement advanced geolocation services for event management and logistics

Develop a **Geolocation Event Planner** that tracks user proximity and triggers automated push notifications. You will integrate interactive maps and camera features, ensuring the application remains optimized for performance and battery efficiency.
